Module Aims
The module aims to develop and enhance students' comprehension of the economy as a whole, enabling them to understand and apply a variety of theoretical models to the analysis of economic problems and to relate these models to policy debates in the real world

Outline Syllabus
Classical macroeconomics Aggregate production and productivity Saving and investment Money and inflation Intertemporal macroeconomics - the AS function and the AS-AD model Approaches to economic growth Macroeconomic policy and theory.

Learning Outcomes	
Outcome Number	Description
01	Describe how the whole economy functions in the long run and short run; understand the features of Keynesian and classical macroeconomics.
02	Have knowledge of economic models and understand issues of current macroeconomic debate; use economic models to analyse economic problems.
03	Use the library and electronic sources; undertake research; write essays and reports; present information orally and in writing.

Learning, Teaching and Assessment Strategy
Concepts and theories will be explored in lectures before being discussed and practised in tutorials. Campus communication will be used to monitor progress and support learning. Examples from the domestic and global economies will illustrate how theoretical ideas are used to analyse practical questions. On-line activities will provide students with formative feedback. Individual support will be given. Lectures will be supported by student preparation for coursework and discussion in seminars.
